# MANDURAH

by PROFILS SYSTÈMES

Mandurah® a collection of aluminium handles for windows, sliding bays, doors and gates, that can suit everyone.

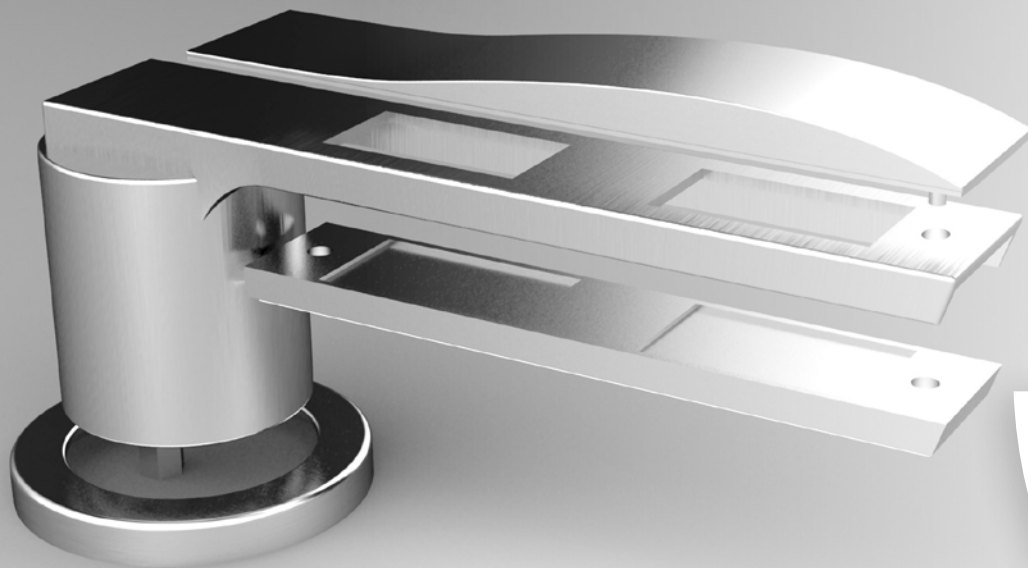

Profils Systèmes has begun a partnership with the designer Patrick Veillet. This is a first for the company, as it is for the designer, who is already a star in the world of high fashion accessories.

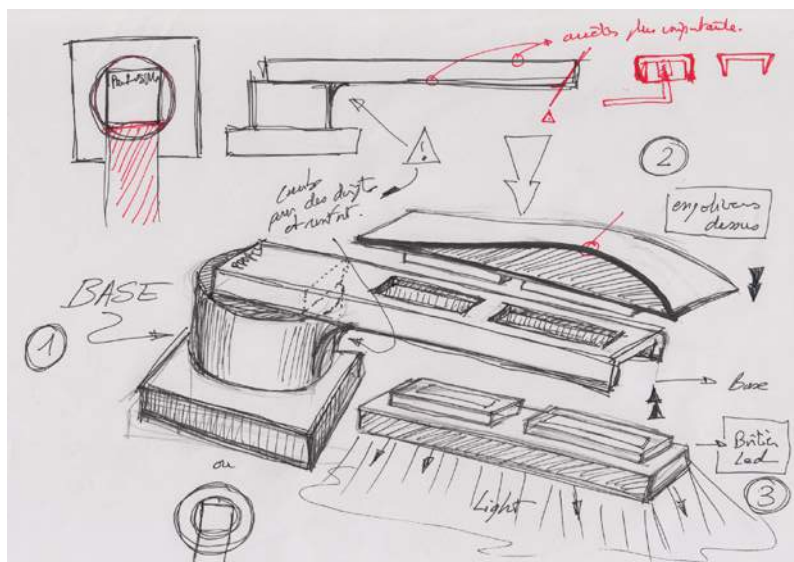

Imagine a series of handles as though they were a fashion collection. One can leave them naked or dress them in oak, teak, wenge, ash, resin... This was the choice Profils Systèmes made with this new series of innovations invented by the designer Patrick Veillet.

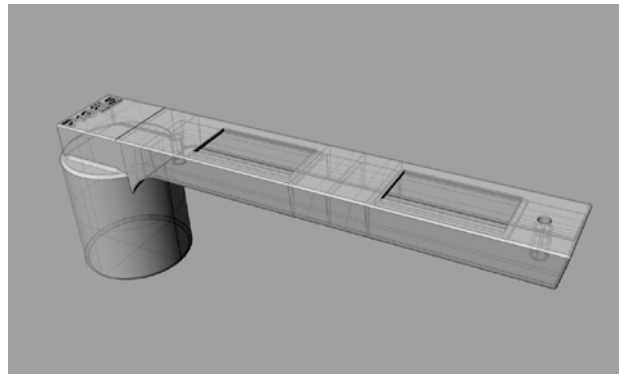

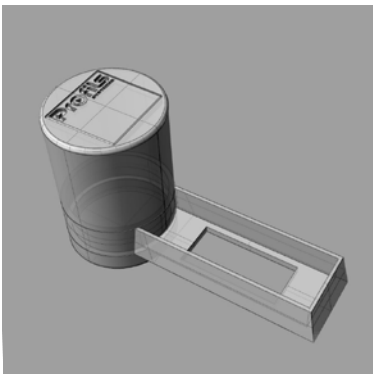

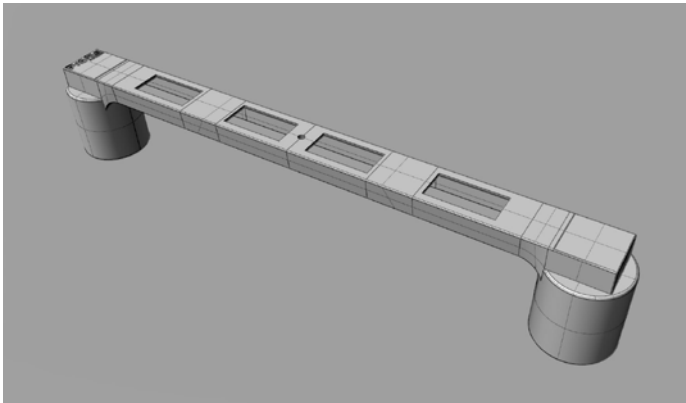

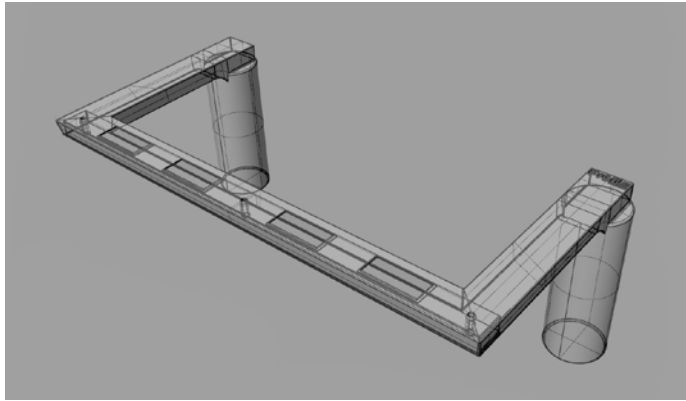

« Creating a design so that an object can be completely harmonious is an art which belongs to designers. What's more, Patrick Veillet has introduced new ideas to add to our basic concepts. This has allowed us to enrich our product without overburdening it or changing its original spirit ».

*Christophe Derré*

Simple in appearance, the Mandurah collection has been designed to look lean and sleek, with light, straight lines. Simple geometric forms are key to the collection ; a circle inside a square, giving rise to a solid rectangle. The Mandurah® sober style allows light to pass through the two rectangles if no decoration is chosen, recalling the original form and function of the windows and sliding bays which they decorate.

Mandurah®,  
exclusive design handles by  
Profils Systemes suits **Cuzco®**, **Dzao®**,  
**Satin Moon®**, eurogroove casement  
windows and doors, **Cuzco®**, **Dzao®**,  
**Satin Road®**, and **Touareg®**, sliding  
ranges and **SharPei®**, **Jack. R®**  
and **Wolf®** Profils Systèmes'  
gates ranges.

Each handle can be customised to fit in with all kinds of interiors. Easily fixed accessories can also be added so that tones and textures can be changed to give a room a new look. It's also possible to use the handles without accessories and add these on later.

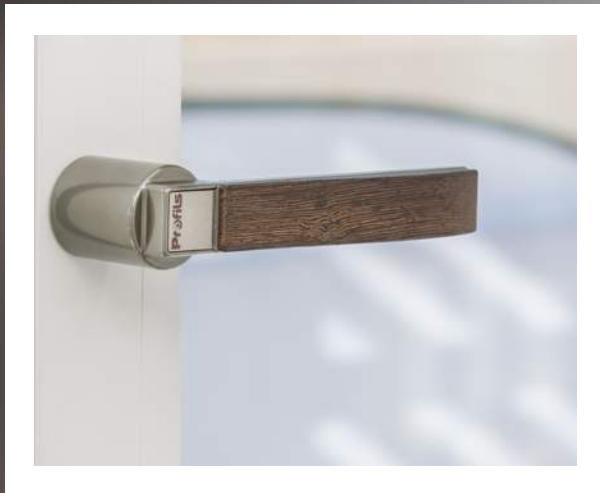

## The aluminium Mandurah® handles

also express this straightforward aspect through the texture used, through the choice of wood or resin, which can either underline the style or soften it. Through the colours, the forms and the textures, we can propose a unique variety of customised styles.

«Taking hold of a Mandurah<sup>®</sup> handle should give people the kind of pleasure they experience when they feel truly at home.» *Christophe Derré*

« What counts is that people enjoy using them. The different styles permitted by customising each object permit an adaptation which can please everybody in the house, while maintaining a common identity which is decorated by the different accessories ».

*Patrick Veillet*

# HINGED WINDOW COLLECTION
