

PRESENTATION

N.O.S Noosa Outdoor Style® is the new outdoor joinery concept for the private residential, collective and professional markets. Because our lifestyles are constantly changing, enjoying and using all outdoor areas at home has become a priority, or a trend, confirmed by the success of bioclimatic pergolas in recent years ... True to its DNA as a precursor Profils Systèmes is now pushing back the limits of outdoor joinery by creating a rich and varied collection of outdoor fittings: new versions of the Wallis&Outdoor® pergola, carports, staircases, gazebos, and aluminium cladding.

Noosa Outdoor Style® allows the creation of unique exteriors, according to new requirements or desired layouts and developments in our lifestyles, always with the same aim of offering an elegant, timeless atmosphere and harmony between comfort and style, whatever the type of dwelling.

Profils Systems is a designer gammiste and French aluminum extruder, specialist of aluminum joinery since 1987. The exterior joinery of the Noosa range Outdoor Style are extruded with 6060 aluminium alloy.

SUMMARY

WALLIS & PARK®	P 04
GAZEBO WALLIS & GARDEN®	P 08
ALUMINIUM FLOOR BATTENS	P 10
BAYAMO® ALUMINIUM STAIRWAY	P 11
MURRAY® ALUMINIUM CLADDING	P 12
DECORATIVE TRANSOMS	P 13
EXCLUSIVE COLOURS	P 14

PRODUCT CONCEPT

The Wallis&Park® aluminium carport is an ideal vehicle shelter solution. Both attractive and economical, the Wallis&Park aluminium carport can be used to house cars, motorbikes, cycles, scooters or a camping-car, but also to store wood, garden tools, ... The carport's aluminium structure protects everything from the weather, falling branches, tree resin, without forgetting also the sun.

DESIGN

- Integrated lighting
- Invisible fixation of the frame
- Only one post needed for the junction of 2 carport
- Wide choice of colours and finish
- Customization

POSTS
